GAFAR ALESHE

+44 7882 655541 | Software Engineer | Computer Science Student | Portsmouth, United Kingdom
gafaraleshe2411@gmail.com | github.com/gafaraleshe | linkedin.com/in/gafaraleshe/ | gafaraleshe.com

TECHNICAL SKILLS

Languages: TypeScript | JavaScript | Python
Frontend: React | Next.js | Tailwind CSS | TanStack Query | React Hook Form
Backend & Systems: Node.js | Express | REST APIs | Multi-Tier Architecture | Authentication | Drizzle ORM
Databases: PostgreSQL | MySQL | SQL | SQLite
Cloud & DevOps: AWS | Docker | Git & GitHub | GitHub Actions | CI/CD

PROFESSIONAL EXPERIENCE

FrontToBack Development - Portsmouth, UK | Frontend Developer & Creative Director **| Dec 2022 – Present**

- Built and deployed 25+ production web applications end to end, from requirements gathering through deployment, delivering responsive, accessible, mobile-first interfaces.
- Turned ambiguous, loosely defined client briefs into clear technical requirements and scoped tasks, explaining technical trade-offs to non-technical clients.
- Implemented e-commerce functionality and SEO integrations using WooCommerce and Yoast, contributing to 3.2× lead growth while maintaining 98% client retention.
- Coordinated work with clients and team members through Slack and Trello, communicating progress in writing and verbally and delivering against deadlines.

PROJECTS

Hermite Labs - Full-Stack SaaS Platform for Creative Businesses | hermitelabs.com | flow.hermitelabs.com

- Architected a multi-tier SaaS platform (Next.js/React client, Node.js API services, PostgreSQL data layer) in a TypeScript monorepo, defining the system design from an open-ended product idea.
- Developed HermiteFlow, a CRM and invoicing application supporting client management, invoice generation, business workflows and automated UK VAT calculations.
- Designed type-safe API workflows backed by PostgreSQL, implementing authentication, role-based access control and validated data handling.
- Containerised services with Docker and implemented automated testing and CI/CD workflows using Jest and GitHub Actions, with version control in Git.

Compound - Secure Studio Booking System | React, Node.js, Express, SQLite | **University Coursework**

- Built a three-tier booking application for studio rooms and equipment: React client, Express REST API and SQLite database, supporting full CRUD workflows.
- Designed the database schema in SQL DDL and applied secure-by-design practices, evaluating multi-factor authentication approaches for user login.
- Audited the application against the OWASP Top 10 (2021), articulating risks and mitigations in a Harvard-referenced technical report and recorded demo.

University Library Management System - Relational Database | MySQL, SQL | **University Coursework**

- Modelled a university library's books, copies, members, staff, loans and fines as a 9-table ERD, normalised step by step from UNF to Third Normal Form.
- Implemented the schema in MySQL with primary/foreign key constraints, triggers and indexes; wrote queries using joins, set operations, grouping and aggregates, analysing performance with EXPLAIN.
- Used AI-assisted development (Claude) under the module's declared-AI policy, testing every query and presenting the design decisions in a written report and live demo.

EDUCATION

University of Essex Online | BSc Computer Science (currently enrolled) | **Expected Graduation : 2028**

- Relevant Modules: Data Structures & Algorithms, Object-Oriented Programming, Web Application Development, Data Modelling

Havant and South Downs College | A Levels: Computer Science, Mathematics, Further Maths **| Sept 2023 – Jul 2025**

CERTIFICATIONS

- CS50x: Introduction to Computer Science - HarvardX (edX) | AWS Cloud Practitioner Essentials - AWS (edX)
- AWS Educate: Introduction to Generative AI | Full-Stack Web Development & Python Pro Bootcamps - Dr Angela Yu
